

## ENVY™

## TURF AND ORNAMENTAL PIGMENT

Envy™ is a combination of pigments and spray adjuvants labeled for application to turf, trees or shrubs. Envy may be used to improve color, mask injury or discoloration and improve the coverage of spray droplets on the leaf blade.

**WHAT MAKES IT BETTER:**

- Natural green color.
- Temperature-stable formulation.
- Superior coverage.
- Broad label recommendations.

*Learn more at [www.precisionlab.com/envy](http://www.precisionlab.com/envy)*

**FEATURES AND BENEFITS**

- Natural green color – appealing to players and customers
