Nature Friendly Product

Made in Poland

Description and product advantages:

- increases the levels of Humic compounds and nutrients in the soil,
- regulates the concentration of nutrients (macro- and microelements),
- significantly reduces leaching of mineral fertilizers so that their use can be reduced by as much as 70%,
- increases the availability and uptake of microelements,
- increases water holding capacity of soils, up to 5 times,
- promotes life in soils
- provides balanced grow of plants, roots and fruits

Organic Matter 58% (derived from Humic Acids and Fulvic Acids)

Application and storage:

To the Soil:

20 l of VOLCANIX® HUMIC ACTIVE COCTAIL
+ 400 l of water = 420 LITERS /1ha

For the best results only 2 times per season, and for the desert areas we recommend to apply 4 times per season. VOLCANIX® HUMIC ACTIVE COCTAIL pour on wet soil, shortly before scheduled cultivations. It is good to spraying the mixture on wet soil just before forecasted rainfall or during such rainfall, so that VOLCANIX® HUMIC ACTIVE COCTAIL could penetrate into root zone of plants as soon as possible.

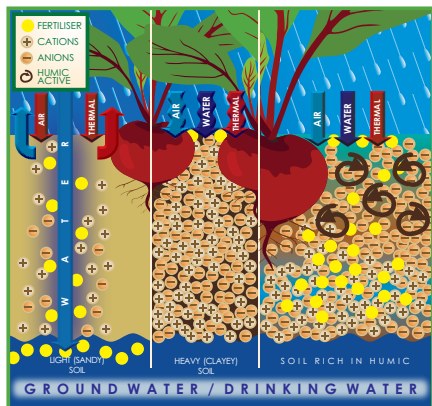

To the Leaves

5 l of VOLCANIX® HUMIC ACTIVE COCTAIL + 200 = 205 LITERS /1ha

For the best results applied from the beginning of vegetation until harvest not more often than once a week.

Supplementary Information:

- ◆ Do not mix with plant pesticides, mineral manures or other products of chemical synthesis.
- ◆ Optimum conditions are high humidity and range of temperature 10-30°C. In sunny days sprays should be performed at early morning or late evening.
- ◆ Store in shaded place in temperature not higher than 40°C
